

PROJECT OVERVIEW

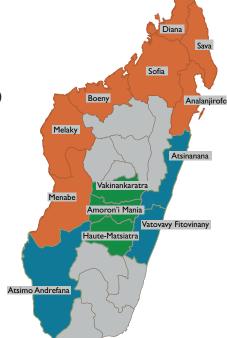

The Accessible Continuum of Care and Essential Services Sustained (ACCESS) program is a five-year (2018-2023) integrated health project funded by the United States Agency for International Development (USAID) and led by Management Sciences for Health. The goal of the program is to accelerate sustainable health impacts for the Malagasy population through three primary objectives:

- Quality health services are sustainably available and accessible to all Malagasy communities in the program's target regions
- Health systems function effectively to support quality service delivery
- The Malagasy people sustainably adopt healthy behaviors and social norms

More specifically, ACCESS will strengthen Madagascar's health system in a sustainable manner in close collaboration with the Ministry of Public Health, scaling up tested and proven interventions, using a systematic approach and a person- and equity-centered strategy. By the end of the program, quality health services will be available at all levels of the health system, from communities to regional hospitals, in order to sustainably reduce maternal and child mortality in Madagascar.

IMPLEMENTING PARTNERS

- Management Sciences for Health (MSH)
- ACOG Foundation (American College of Obstetricians and Gynecologists)
- American Academy of Pediatrics (AAP)
- American College of Nurse-Midwives (ACNM)
- Action Socio-Sanitaire Organisation Secours (ASOS)
- Johns Hopkins Center for Communication Programs (CCP)
- Catholic Relief Services (CRS)
- Dimagi
- Full package except for WASH infrastructure (2019-2023)
- Clinical capacity building and WASH infrastructure (2019-2020); full package (2021-2023)
- Training of trainers in Family Planning

EXPANDED AND IMPROVED QUALITY OF INTEGRATED CONTINUUM OF CARE

Create fully functional service delivery points

Build clinical skills of community health volunteers (CHVs), basic health center (CSB) staff, and district hospital providers

Assure quality of service delivery through mentorship, supervision, and quality improvement teams

Strengthen the referral/counter-referral system

Support mobile clinics and other outreach strategies

Provide medical equipment and improve water, sanitation, and hygiene infrastructure

Increase availability of and accessibility to emergency transport

HEALTH SYSTEMS STRENGTHENING

Strengthen governance structures at national and district levels

Improve the use of District Health Information System II (DHIS2) for decentralized planning and monitoring and evaluation

Mentor district management teams and CSB staff to improve data quality

Improve supply chain management for health commodities

Mobilize resources for universal health coverage

Build the capacity of the Ministry of Public Health in leadership, management, and governance; health planning, budgeting, and coordination; and self-evaluations and organizational improvements

COMMUNITY ENGAGEMENT AND EMPOWERMENT

Apply the Champions for Change approach

Apply the Positive Youth Development approach

Apply the Community Led Total Sanitation approach

Apply the Intensive Community Nutrition approach

Increase enrollment in community health insurance

Expand Saving and Internal Lending Community groups

Engage in operational research, ongoing project learning, and adaptive management

Share lessons learned, good practices, and data

Ensure evidence-based planning and budgeting

Pilot and scale up cost-effective health technologies
