

# WORKING WITH

**M**ANAGEMENT SCIENCES FOR HEALTH is a global nonprofit organization that provides governments, health organizations, communities, and the private sector with the strategies, tools, and management support they need to effectively and efficiently deliver high-functioning health systems. For more than 50 years, MSH has consistently fostered innovation, delivered technical and implementation excellence, and driven sustained results in more than 150 countries through our leadership of global, regional, and bilateral programs.

## US Government Mechanisms

MSH's seasoned technical and program teams apply disciplined Systems Thinking for Health, inclusive implementation processes, and ISO 9001-certified quality management to expertly design, execute, and monitor lifesaving programs that meet the objectives and exceed the expectations of donors, clients, and partners. A trusted US Government partner, MSH offers our expertise through several acquisition and assistance mechanisms and through the GSA Schedule and OASIS+.

### USAID NextGen Comprehensive Technical Assistance (NextGen Comprehensive TA) for Health Supply Chain and Pharmaceutical Management IDIQ

- Global IDIQ (indefinite delivery, indefinite quantity) contract, allowing for a variety of task order contract types
- Term: 2024–2034 • Ceiling: \$2.2B
- MSH Role: Prime contractor (1 of 5 unrestricted IDIQ holders)
- Contact: Connect with the MSH team at [partnerwithus@msh.org](mailto:partnerwithus@msh.org).

Through NextGen Comprehensive TA—a key element of USAID's \$9B NextGen Global Health Supply Chain Suite of Programs—MSH is positioned to support countries in **sustainably, holistically strengthening their pharmaceutical and supply chain systems** by building **better-performing supply chains** that draw on the capabilities and resources of public and private sectors; providing operational and technical support to **increase access to health commodities**; and **improving pharmaceutical services, management systems, and regulatory capacities** to ensure achievement of health impact and save lives. USAID is expected to issue one or more global task orders as buy-in mechanisms through which Missions may design activities to meet specific country needs. Missions may also develop bilateral task orders for competition among the IDIQ holders.

### PEPFAR/USAID Reaching Impact, Saturation and Epidemic Control (RISE)

- Global cooperative agreement
- Term: 2019–2025 • Ceiling: \$391M
- MSH Role: Lead subpartner for health systems strengthening (with Jhpiego as prime recipient)
- Contact: Tigistu Ashengo (Jhpiego), Project Director, [tigi.adamu@jhpigo.org](mailto:tigi.adamu@jhpigo.org)

Under RISE, MSH helps countries address critical HIV priorities and strengthen global health security by improving key health systems functions, including **health information systems, human resources for health, financial systems, and supply chains**.

## MSH'S CORE CAPABILITIES

MSH strengthens health systems by building sustainable capacities in:

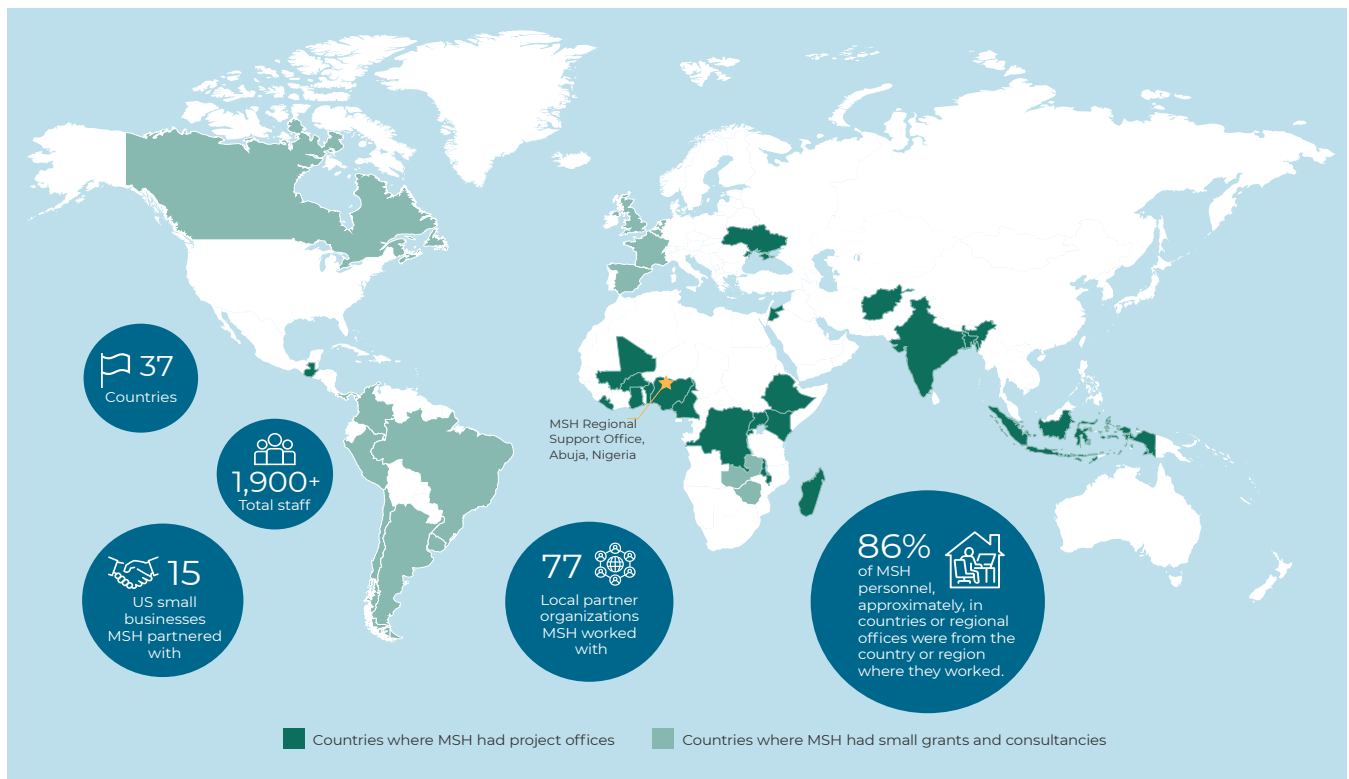

- Pharmaceutical management and regulatory systems
- Public- and private-sector supply chains
- Optimization of health products and technologies
- Health care financing
- Institutional governance, management, and leadership
- Management and use of health data
- Advocacy and policy development

MSH helps countries address their most pressing health challenges, including:

- Expanded access to high-quality care
- Integration of primary health care services
- Infectious diseases, including TB, HIV and AIDS, and malaria
- Maternal, newborn, and child health
- Noncommunicable diseases
- Pandemic preparedness and response

MSH builds an enabling environment by:

- Supporting locally led development
- Engaging communities, civil society, faith-based organizations, and the private sector
- Fostering innovation
- Building a culture of collaborating, learning, and adapting

## CDC Building Capacity for National Public Health Institutes (NPHIs)

- Global cooperative agreement • Term: 2020–2025 • Ceiling: \$3M • MSH Role: Prime recipient
- Contact: Connect with the MSH team at [partnerwithus@msh.org](mailto:partnerwithus@msh.org).

This program builds the capacities and resources of NPHIs to collaborate across governments, the private sector, and civil society to coordinate **lab systems and disease-specific control programs**, **health research**, **health workforce development**, and **national responses to existing and emerging diseases and other health emergencies**.

## GSA Schedule

IDIQ Contract #: 47QRAA21D0069

Base term: 2021–2026

All MSH capabilities are available through the General Services Administration's Multiple Award Schedule for work of any size and scope with simplified contracting and flexible pricing, with ceilings already deemed fair and reasonable by the GSA. Services available:

- SIN 541990TAD: Scientific Management and Solutions/Scientific Services, including *Technical/Application Development Support (TADS)*
- SIN 541611: Professional/Business Administrative Services, including *Management and Financial Consulting*, *Acquisition and Grants Management Support*, and *Business Program and Project Management Services*
- Order Level Materials (OLM): Procurement of materials of up to one-third of task order value

## GSA OASIS+ Unrestricted

IDIQ Contract #: 47QRCA25DU222

Base term: 2024–2029

- A full suite of MSH services is available to all Federal agencies through the GSA's One Acquisition Solution for Integrated Services under the OASIS+ Management and Advisory Domain, which cover a wide range of technical, strategic, business process, planning, costing, policy, and other areas of work.
- Task Orders under OASIS+ may include any contract type, including hybrid structures; complex commercial or non-commercial services; and work in any location with no contract ceiling or cap on awards.
